STUDENT DESIGN

COLOR IN INTERIOR DESIGN

COURSE DESCRIPTION: Color provides an essential foundation for successful interior design. Students will explore the use of color as a design element in interior environments and how it contributes to creating a design solution that fulfills their clients' needs.

RATIONALE: Interior designers must have solid knowledge of color and its effect on design. Recognizing and explaining color terminology, applications and significance is essential to a designer's success in the interior design field.

LEARNING OBJECTIVES:

Understand color's role in interior design and articulate its effects.

- Build harmonious palettes.
- Appreciate cultural color associations.
- Recognize the psychology and impact of color.

Define and utilize color terminology as it relates to design.

- Learn the history of color.
- Examine the science of color and its perception.
- Understand the nuances of color vocabulary.

Help clients visualize color in design through renderings.

- Explore effective use of building information modeling software.
- Create a visual representation illustrating design solutions.
